## Introduction

The interview is an important part of the selection process; however, studies show that most interviews are poorly done. Using a stock list of interview questions to ask every candidate will not lead the interviewer to the important areas necessary for the effective placement of each individual. This Interview Guide, coupled with the ProfileXT Performance Model Comparison, will help make each interview a valuable tool.

The scientifically developed Performance Model for this position reflects a solid understanding of what the job requires. The Total Person information related to this model allows us to create interview questions that will allow you to get the information you need to make the best possible decision about each candidate.

This report reflects the responses provided by Sally Sample when she completed the ProfileXT assessment. A Summary Graph is included that shows her scores and how she fits to the Performance Model for this position. It gives a quick overview of where she is in or out of the model and also shows her overall percentage match. The result for each characteristic is illustrated on a scale from 1 to 10. The darker area on each scale represents the best Job Match for the position. The enlarged segment of the scale shows where Sally scored. If the enlarged segment is dark, Sally is in the Job Match model. If it is lighter, she is not.

The interview questions provided are based on how well Ms. Sample fits the Performance Model. Where she is outside the model the questions will take the interviewer into areas where potentially important information will be addressed. The questions provided where she is in the model provide you with confirmation that she is right for the job. Each question should be considered for use in her placement interview. A space is provided to record the interviewer's thoughts when the response to a question provides important information regarding placement in the position for which Ms. Sample is being considered.

Please consult the User's Guide for additional information on using these results when working with Sally. As discussed in the User's Guide for this product, the results from this or any assessment should never make up more than a third of the final decision in placements.
